Philanthropic Solutions

ZEDRA has the expertise to establish and manage charitable trusts and foundations. We begin with an in depth discussion with clients on their philanthropic vision or charitable intentions to ensure a viable and appropriate structure is in place to realise their aspirations. We also work with clients and appointed committees to ensure that ongoing and evolving client objectives and commitments to charitable causes continue to be met.

Family Governance Solutions

As Asian business families stand on the cusp of a generational 'changing of the guard,' it is imperative that the transition takes place as seamlessly as possible, thereby ensuring that business continuity and family unity stay intact, safeguarding the efforts of the business founders over the past decades. A properly constituted family governance framework assists both family and non-family members in the business to navigate through control and decision making issues in the long run.

A family governance framework also seeks to institutionalise a family's core values and philanthropic goals, thereby enabling an ever expanding family to find common ground as the family and business grow and develop through the generations.
